A slight increase was recorded in the number of criminal complaints reported during 1930 in comparison with the year 1929, there being an increase of 2158 complaints for 1930. There were 5,173 clearances for 1930 as compared with 4,759 for 1929.

Burglary complaints for the year 1930 increased as compared with 1929, there being 136 more complaints during 1930.

There were twelve homicides reported during 1930 as compared with eleven during 1929, and at the conclusion of the year 1930 only one remained uncleared. The murder which was not cleared was committed during the latter part of December, 1930.

A tabulation of the major criminal complaints, clearances, arrests, and the amount of property stolen and recovered, will be found on the page following.

1930-1929
CRIME CLASSIFICATION
1930

CRIMINAL IDENTIFICATION

The Fingerprint Division of the Bureau of Identification reports the following activity during the year 1930:

Prisoners fingerprinted and photographed, including 371 who were Bertilloned	2665
Prisoners fingerprinted only	1015
Prisoners brought to the Bureau who had been photographed and fingerprinted at the Bureau prior to 1930	936

Total number of prisoners brought to the Bureau 4,616

This number of prisoners required 14,340 fingerprint cards, of which 10,660 were sent to other identification bureaus, and 3,680 cards placed on file in the Bureau of Identification here. In addition to the local fingerprint cards filed, the Bureau received 1,964 fingerprint cards from other jurisdictions of prisoners wanted, which were properly classified and filed. The total number of fingerprint cards classified and added to the file during the year 1930 amounted to 5,644 cards.

Through the fingerprint system the Bureau succeeded in identifying 72 prisoners who denied having been previously arrested or fingerprinted in this city.

All employees of the Department, as well as uniformed and plain-clothes officers, are fingerprinted in the Bureau, and during the year 1930 there were fingerprints taken of 80 newly-appointed members and employees of the Department.

Identifications were made of 2,665 subjects who were fingerprinted here and whose prints were sent to various identification bureaus, 1091 criminal records on the subjects being returned to the Bureau.

During 1930 the Bureau of Identification was requested in 46 instances to visit places where crimes had been committed to examine the premises with a view of obtaining fingerprints in an effort to establish the identity of the perpetrator.

The Photographic Division photographed 2,665 new prisoners during 1930. There were also numerous other persons and objects photographed, and the total number of prints made during the year was 18,093.

The Stenographic and Clerical Division of the Bureau of Identification has as one of its chief duties the preparation of fingerprint cards for mailing to various identification bureaus. During the past year 14,340 cards were completed, preparatory to their distribution to the other bureaus.

The names and aliases of each person brought to the Bureau of Identification, as well as information received from other jurisdictions concerning offenders, are recorded on file cards. Three distinct colors are used to differentiate between local and foreign subjects, and aliases, necessitating the writing and filing of 15,380 cards during 1930.

The Bureau of Identification responds to communications dealing specifically with records and information relating to subjects identified through the medium of fingerprints. This type of correspondence requires the extensive preparation of information and consumes a correspondingly greater period of time than is required for average correspondence. A total of 1,097 letters were written in the Bureau during 1930.

Upon the request of officers for assistance in the preparation of cases against local prisoners, the Bureau compiled and typed 360 criminal records on official stationery for use as evidence in court.

The Handwriting File was developed extensively during 1930. Specimens of prisoners' handwriting are arranged in this file according to the Lee and Abbey system of Classification, and during the year 3,680 prisoners filled out handwriting cards.

* * *

AUTOMOBILE DIVISION

There are on file in the Automobile Division approximately 250,000 cards bearing the descriptions of automobiles stolen from various sections of the United States and Canada, about 100,000 of which were received during 1930.

Of the 2,311 automobiles stolen in the City of Milwaukee during the year 1930, 2,177 were recovered. There were also 30 recoveries made of automobiles reported stolen prior to 1930.

In addition to the automobiles recovered that were stolen in Milwaukee, 216 were recovered from other cities, making a grand total of 2,523 recoveries by the Automobile Division.

The number of arrests for automobile theft during 1930 was 297, compared with 222 similar arrests during 1929.

STENOGRAPHIC DIVISION

All criminal correspondence of the Police Department is filed in the Detective Clerical Bureau. During the year 1930 there were approximately 3,220 letters and 1,779 telegrams written, and approximately 5,000 letters, telegrams and long distance telephone calls received, together with hundreds of circulars from all sections of the country. Approximately 20,000 index cards were required that this correspondence might be properly indexed.

The Detective Clerical Bureau compiles a daily police bulletin which imparts information regarding the operations of criminals within the corporate limits of the city, automobiles stolen, bicycles stolen, persons missing, thieves wanted, criminals being sought, and other relevant information. This bulletin is compiled daily and during the year 1930 there were approximately 541,000 copies distributed to members of the Department, the Park Police, the police departments in Shorewood, Whitefish Bay, River Hills, West Milwaukee, West Allis, Town of Milwaukee, the Sheriffs of Milwaukee and Waukesha Counties, and officers of the detention home. The results obtained through the disseminating of this information is very gratifying and numerous arrests have been effected through the use of the bulletin, as well as the locating of missing persons and the recovery of stolen bicycles and automobiles. Prior to the publication of the bulletin, uniformed officers had no knowledge of criminals wanted but since its inception they possess detailed information which aids them in the performance of their duties.

The Stenographic Division of the Detective Clerical Bureau made verbatim notations of 586 statements during the year 1930.

* * * *

MISSING PERSONS

Besides the daily bulletin referred to above there is a daily radio news bulletin which is broadcast each night at 10:00 p.m. over Radio Station W.T.M.J. This radio bulletin comprises announcements regarding missing persons whose relatives desire to locate them and missing persons from other jurisdictions whose relatives request a descriptive broadcast. This bulletin, with the widespread reception which radio can accomplish, has proved of great assistance in the locating of missing persons who are living in other cities.

Figures concerning the locating of missing persons will be found on the page following.

MISSING PERSONS

During the year 1930 a total of 1,212 persons were reported missing from their homes in this city, of which number 1,033 were reported located or returned, leaving 179 unaccounted.

COMPLAINT REPORTS

During the year 1930 there were filed in the Detective Clerical Bureau 11,000 criminal complaints, including complaints of crimes occurring outside of the jurisdiction of this Department. After being properly assigned to detectives for a thorough investigation, these complaints are sent to the Detective Clerical Bureau. Information pertaining to the pawn division is transferred from the complaints to the records of that division, where the various items are listed in detail and then compared with the reports of the pawnbrokers and second-hand dealers. All information pertaining to automobiles is filed in the automobile division, and later a considerable portion of the daily bulletin is compiled from the complaint reports received. The reports are then classified according to districts and the information contained therein is sent to the respective district captains, who are thus informed daily of activities in their districts. When the complaint reports have been handled as described, they are indexed alphabetically according to the name of the complainant, given a department number, indexed under the number of the officer who issued the report, classified according to the nature of the crime, then permanently filed according to department number.

A record is also kept in the Detective Clerical Bureau of all complaints received and information regarding them is sent out monthly to the Bureau of Investigation, United States Department of Justice, Washington, D.C., where it is published monthly in conjunction with reports of many of the largest cities in the country.

* * * *

PAWN DIVISION

The Pawn Division in the Detective Clerical Bureau has produced satisfactory results during 1930, the extent of which may be ascertained by a perusal of the following tabulation:

<u>Month</u>	<u>Items Recov'd.</u>	<u>Value</u>
January	13	910.00
February	18	1,332.50
March	4	83.50
April	11	126.50
May	10	559.00
June	12	327.00
July	7	643.50
August	6	382.50
September	8	259.00
October	21	1,282.50
November	14	635.50
December	15	1,010.00

During 1930 there were 139 items recovered, carrying a value of \$9,399.50, through the efforts of the Pawn Division.

* * * *

DETECTIVES' DAILY REPORTS

Detective Sergeants, Detectives and Policewomen are required to submit daily a report covering the work performed by them during the previous twenty-four hours. The report contains in detail information regarding arrests made, court attendance, local investigations performed, property recovered, investigations of communications received from other jurisdictions, cases cleared, dispositions of cases, arrests, and any other of numerous special duties that may be performed. These daily reports are received in the Secretarial Bureau, where they are carefully checked and the information transferred to monthly cards. A resume of the information on the monthly cards is in turn noted on an annual card. Thus the work of each Detective Sergeant, Detective and Policewoman is classified in detail and an instant comprehension of the work performed by any individual during the entire year may be gained from the records.

The information contained on the annual cards at the close of the year is transferred in the form of an annual report for the entire Detective Bureau.

The Secretarial Bureau transferred information from approximately 24,095 daily detectives' reports, 730 policewomen's daily reports, and 2,160 detective sergeant's reports during 1930, and there were 756 monthly cards and 63 annual cards containing detailed information.

* * * *

RADIO

On December 24, 1930, at 9:30 a.m., there was placed in actual service a police radio dispatch system. The radio alarm originates in the switchboard operators' room at headquarters and thence is carried by remote control to the radio broadcasting set, located at one of the precinct stations. From that point it is broadcast to seventeen squad cars which travel in specified districts covering the entire city continuously throughout the day and night. Since its inception, and in the seven days preceding the close of the year 1930, 286 radio dispatches and alarms were broadcast.

From one to four minutes are usually required for the radio squad dispatched to arrive at the designated place and it is rarely that a squad consumes more than two minutes in reaching its destination.

The squads responded to 41 calls for intervention in family troubles and fights, and it is reasonable to believe that their quick arrival may have prevented serious injury to some of the participants.

On December 25, 1930, a colored man was shot. His assailant was apprehended and arrested by a squad within two minutes after it had received the radio alarm, and he is now being held, charged with Murder. On December 28, 1930, a squad received information that an insane man with a shotgun was discharging the same in his home. The squad arrived at the scene four minutes after receiving the radio alarm, the man was taken into custody and sent to the County Hospital for mental observation. On December 28, 1930, a squad received a call that a man was threatening his wife with a butcher knife. They arrived at the scene two minutes after receiving the information and placed the man under arrest.

Assistance is also rendered by the radio squads in saving the lives of people who attempt suicide. On December 27, 1930, a squad received an alarm regarding a woman who had attempted suicide by asphyxiation and slashing her wrist with a razor. They arrived on the scene two minutes later and found the woman, her body partly out of a third-story window. Undoubtedly their rapid arrival prevented her fall from the window. The woman was taken to the Emergency Hospital for mental observation.

SUICIDES, ATTEMPTED SUICIDES AND SUDDEN DEATHS

There were 254 cases of suicide or attempted suicide investigated by the Department during the year 1930, and of this number 140 were males and 114 females.

Investigation indicated that suicides and attempted suicides of women were chiefly due to despondency caused by family quarrels or ill health. Many reasons were given for suicides or attempted suicides of males, some of the foremost being despondency due to failure in business, lack of employment, family quarrels, and ill health.

There were 210 investigations of sudden deaths, of which 174 were males and 36 females. The causes of these deaths were attributed principally to heart trouble, apoplexy and alcoholism.

During the year 1930 there were 12 homicides committed, and a synopsis of each follows:

On January 27, 1930, Mary Skube, age 18 years, rooming at 614 Seventh Avenue, gave birth to a male child in a lavatory at that address and wrapped a towel around the child, causing strangulation. She then placed the child in a steel pail, covering it with a mop, and attempted to commit suicide by taking lysol. She was arrested the same day and charged with Murder. In Municipal Court the charge was changed to Manslaughter and she was sentenced to serve five years at the Wisconsin Industrial Home for Women, Taycheedah, Wisconsin, on March 13, 1930. Case cleared.

On February 5, 1930, Gustave Tietz, Jr., during a family quarrel at the home of his father, 947 - 36th Street, shot his father, Gustave Tietz, Sr., through the neck. Mr. Tietz, Sr., was conveyed to the Misericordia Hospital, where he died on the operating table. Young Tietz was arrested on February 10, 1930, and charged with Murder. The case was tried in Municipal Court and he was found not guilty on May 28, 1930. Case cleared.

On May 3, 1930, Everett Barnet, alias Barney Woods (colored), age 40 years, shot and killed Alice Young (colored), with whom he had cohabited for three years previous to the murder. Woods then committed suicide at the place where the murder was committed, 503 Fifth Street. Murder and suicide--case cleared.

On May 27, 1930, John Wattis (colored), living at 507 Seventh Street, called on his wife, Georgia Wattis (colored), living at 617 Vliet Street, from whom he had been estranged. While both were seated on a bed, an argument arose, during the course of which Wattis stabbed his wife through the heart with a knife. Wattis was arrested the next day and charged with Murder, first degree. The case was tried in Municipal Court and he was sentenced to life imprisonment in the Wisconsin State Prison, on June 17, 1930. Case cleared.

On June 8, 1930, the body of Ursula Lang was found in Room 1820 of the Hotel Schroeder. It later developed that she had entered into a suicide pact with Donald Allison, but that he had not kept the agreement. Allison was apprehended on June 12, 1930, and charged with Murder. Later in Municipal Court the charge was changed to Manslaughter, first degree, and Allison was sentenced to from five to ten years imprisonment in the Wisconsin State Prison, July 25, 1930. Case cleared.

On July 2, 1930, Mrs. Pauline Zacher, 69 years of age, living at 136 - 20th Street, Apartment #3, was found murdered in her apartment. The act was committed by tying her hands in back and twisting a knotted towel around her throat, causing strangulation.

William P. Mitchell, the suspected murderer, was apprehended on July 18, 1930. He confessed to the commission of the crime and was charged with Murder. The case was tried in Municipal Court and he was sentenced to life imprisonment in the Wisconsin State Prison, September 20, 1930. Case cleared.

On July 23, 1930, William Phillips, age 19 years, of 165 Oak Park Court, shot and killed his father at that address. The father had apparently been ruling the family with an iron hand for several years past and had several times threatened to kill his son, as William was continually interfering when the elder Phillips was beating his wife. It developed that the elder Phillips had engaged in moonshine liquor distribution for eight years prior to his death and that he maintained two stills in the basement of his home for the manufacture of liquor. William Phillips was found guilty of Manslaughter in Municipal Court and sentenced to fourteen years imprisonment in the Wisconsin State Prison, October 31, 1930. Case cleared.

On October 8, 1930, Frank Webb, age 36 years, living at 225 Greenbush Street, was stabbed in the right side of chest with a scissors by Joe Martinez during a violent quarrel. Webb died at Emergency Hospital later the same day of the wound inflicted. Martinez was arrested on October 10, 1930, and charged with Murder. He was found guilty of Manslaughter in Municipal Court and sentenced to imprisonment of from fourteen to twenty-five years in the Wisconsin State Prison, November 11, 1930. Case cleared.

On November 11, 1930, Herman Schneeweis, living at 2462 North Eighth Street, attempted to kill himself and his wife by allowing illuminating gas to escape from a jet in their bedroom. His wife was unaware of his intention and sleeping at the time, and as a result was overcome and eventually died. Herman Schneeweis survived the effect of the gas and is at present convalescing at the County Hospital, under surveillance. Case cleared.

On December 14, 1930, Sam T. Cropp (colored), at the intersection of Eighth and Galena Streets, engaged in a quarrel with his sweetheart, which resulted in his being stabbed to death by his sweetheart's girl friend, Marjorie Neal (colored), age 18 years, living at 488 Eighth Street, who witnessed the quarrel. Marjorie Neal was arrested the same day on the charge of Murder and is now being held awaiting trial. Case cleared.

On December 24, 1930, Dr. William O. Koehn, a dentist, was assaulted and killed by two unknown assailants in his office at 1610 West National Avenue. Prior to the close of the year these assailants had not been apprehended and the motive prompting the murder is unknown.

On December 25, 1930, Walter Walker, alias Johnson, (colored), age 29, of 525 West Cherry Street, engaged in a game of whist with the landlady at 519 West Cherry Street, and argued with her regarding winning points. Robert Wagner, a witness to this argument, intervened. Walker pulled a 38-caliber Smith and Wesson revolver from his pocket and shot Wagner, who later died as a result of the wound. Walter Walker is being held awaiting trial on the charge of Murder. Case cleared.

TRAFFIC

The following classification of accidents and statistical summary has been compiled on the same basis since the year 1924. The results accomplished during 1930 are strikingly revealed in this report and are due to a large extent to the application and enforcement of the Wisconsin Uniform Traffic Code which went into effect in 1929. A portion of the reduction may also be due to the proper execution of left hand turns and the marking of traffic lanes at important intersections.

Types of Accidents and their Causes

For the past seven years all accidents have been classed under one of the four following groups:

1. Collisions involving motor or horse-drawn vehicles
2. Collisions involving street cars or trains
3. Collisions involving pedestrians or children
4. Miscellaneous collisions

These various types of collisions have been segregated according to causes. The number of causes have been condensed into thirteen groups, which cover a majority of cases.

The analysis for the year 1930 includes 10,857 traffic accidents as compared with 11,805 accidents during 1929; 11,472 during 1928; 12,135 during 1927; and 11,834 during 1926. This is a decrease of 948 accidents or 79 accidents per month, as compared with the year 1927, during which year the largest number of accidents occurred.

It is interesting to note that the trend of accident figures was upward until the close of the year 1927 with 12,135 accidents, but since that time the total has remained well under the record for that year, with the greatest reduction shown in 1930.

The tabulations following illustrate in detail figures for 1930 as compared with previous years.

Cause	<u>Number of Accidents</u>					<u>Per Cent of Total</u>				
	1930	1929	1928	1927	1926	1930	1929	1928	1927	1926

Struck by Vehicle Turning Corner	61	95	86	100	148	.5	.8	.7	.8	1.2
Miscellaneous.	311	382	448	549	646	2.9	3.2	3.9	4.5	5.5
Cause Undetermined	15	13	98	208	242	.1	.1	.8	1.7	2.0
	10857	11805	11472	12135	11834	100.0	100.0	100.0	100.0	100.0

NOTE: The total number of accidents for the year 1930 as shown in the above tabulation differs by 2,829 with the total of our report on the page following. This difference is accounted for by the fact that since July 1, 1927, the minor accident reports (where property damage does not exceed \$25.00) are listed, but are not figured in our detailed report.

T O T A L	18784	19087

Note: A noticeable variation appears in some of the totals shown in the foregoing tabulation. This variation can be attributed to the new Wisconsin Uniform Traffic Code, which went into effect during 1929.

DISPOSITIONS

December 31, 1929 - 1930

Dismissed by Court	272	254
Fined	18319	18654
Imprisoned	9	23
Released after Warning	13372	513
Released for want of sufficient evidence		4
Sentence Suspended	<u>199</u>	<u>127</u>
	32171	19575

Note: The large increase in the number of "Released after Warning" is due to the fact that parking violation releases are now recorded daily, whereas, prior to December 19, 1929, this record was not kept.

TRAFFIC BUREAU

During the year 1930 there were 1,158 chauffeurs' applications investigated by members of this Bureau, and investigations of complaints regarding traffic conditions numbered 548. There were also 4,963 accidents re-investigated and 286 drivers' tests recorded during the year.

There were 18,784 cards containing information regarding traffic arrests, written and filed in the Bureau during 1930.

- - - - -

There has been a very noticeable decrease in the number of traffic accidents during the year 1930. Very few types of accidents show an increase of any great number. It must be borne in mind that the traffic figures shown on the preceding pages are not commensurate with the true results of preventive measures.

National statistics indicate that all types of traffic accidents are on the increase and it is reasonable to believe that through the constructive work of this Bureau a decrease instead of increase is shown for the City of Milwaukee.

POLICE ALARM DIVISION

The telephone system of the Department embodies 25 trunk lines connected directly with the switchboards of the local Telephone Company. There are three multiple switchboards installed to handle departmental telephone calls and these are connected with the various bureaus and district stations through the use of 122 extension or local lines.

During the year 1930 there were 1,200,000 calls handled by the Alarm Division over trunk lines from the Telephone Company switchboards and 2,249,611 calls over the Department's local system. There were also 24,091 patrol wagon and ambulance calls completed.

Information received and disposed of by operators in this division includes hourly reports from patrolmen, reports from patrol sergeants, reports from detectives, reports for radio broadcast, reports of dead animals, reports of electric street lights burned out, and numerous miscellaneous telephone communications.

MEDICAL BUREAU

The Medical Bureau of this Department consists of 5 Police Surgeons. During the year 1930 these surgeons investigated 831 cases of sickness and injury among members of the Department, and where injury occurred in the performance of duty, medical attention was given.

When a member of the Department is reported sick or injured, a Police Surgeon is assigned to the case to ascertain the cause of disability and also to estimate the probable duration.

When sudden deaths, suicides, attempted suicides, criminal assaults, murders or fatal accidents are reported, a member of the Medical Bureau is immediately detailed to make a medical investigation, and during the year 1930 there were 740 of these special investigations recorded.

POLICE TRAINING SCHOOL

The Police Training School of this Department was estab-

lished in 1921 and is located at Police Headquarters. The School provides for all members of the Department who may be ordered to attend, instructions on the subjects of Laws, Ordinances, Department rules and regulations, Evidence, Observation, Department, Hygiene, Military Courtesy, Drill and Revolver practice, First Aid to the Injured, and other matters essential to the proper performance of police duties. The school is under the immediate supervision of a Captain of Police.

All lieutenants, detective sergeants, sergeants, detectives and patrolmen in the Department attend the School during a period of approximately eight months per year until they have been in service fifteen years; after this time they attend once every two weeks for the remainder of the time they are in the service. Superior officers are assigned to separate classes. Regular classes of instruction were conducted this year from January 6 to June 30 and from November 3 to December 29, and 344 classes were held during the period mentioned, with a total attendance of 24,729. During the year there were 27 classes conducted for men who had been on the Department fifteen years or longer, with a total attendance of 1,366.

When new recruits are appointed, they attend the School for a period of thirty days and travel with an older member four hours each evening to receive practical experience. At the expiration of this period they are assigned to regular classes and patrol regular beats. There were 212 special classes for recruits conducted during 1930, with a total attendance of 1,379.

Examinations are given at intervals during the year for the purpose of determining the efficiency of members of the Department.

Military drill and training was conducted from March 26 until June 1, on Monday, Wednesday and Friday of each week. All of the men attending classes, except patrol wagon and ambulance men, were assigned to companies and required to drill once each week.

Classes in target instruction and pistol practice numbered 52 and the total attendance at these classes was 1,379. There were also 15 experimental classes conducted, with a total attendance of 255.

The first of these is the
 fact that the population
 of the country has increased
 very rapidly since the
 year 1800. This is due
 to a number of causes,
 the most important of which
 are the discovery of
 gold in California and
 the invention of the
 steam engine.
